

# Card Game: Equal 16

Played in: Pairs or Trios

Directions:

1. Shuffle the cards. Place in front of the players.
2. Players take turns drawing three cards at a time.

Addition: The first player to have exactly 3 cards that total 16 is the winner. If the first three cards chosen do not add up to 16, the players continue to choose cards until one person gets it.

Multiplication: The first player to have 3 cards with a product of 72 wins.

Variations: Choose different numbers the cards can add up to.
